MADE THE PHARMA WAY.

SIRIO

THE NUTRA SPECIALISTS

Nutraceuticals, made the pharma way.

In 1992, in the small German town of Pritzwalk, SIRIO Pharma made its first softgels. More than thirty years later, we still make every one the way a pharmaceutical company would.

Our site has held a European GMP license for pharmaceutical softgels since 1996, is FDA-registered and carries seven quality certifications. We bring that same discipline to nutraceuticals, so brands that want the rigor of medicine, can launch with fewer regulatory hurdles.

That is why science-led brands bring us their most demanding ideas: sensitive ingredients, complex formulations, concepts that others call too difficult. We turn them into premium softgels that are stable, effective and a pleasure to take.

This catalogue presents four of our most frequently requested nutraceutical concepts. They are not your mainstream softgels. They are distinctive, complex formulations that help you stand out in a crowded market.

Each concept is fully formulated, backed by scientific rationale and built on real consumer insight, so you can launch quickly and with confidence. Development, production and packaging all happen on one campus, so the road from idea to shelf stays short.

Four premium softgel concepts to get you started. Pharma-grade production. Ready to launch when you are.

DEEP HYDRATION.
VISIBLE RADIANCE.
