Today, healthy aging means protecting everyday health rather than striving for perfection. As modern life leaves little time or energy to spare, consumers are drawn to simple, effective solutions that fit effortlessly into their routines—making enjoyable, repeatable habits the key to long-term healthy aging.

(Source: FMCG Gurus Survey 2025)

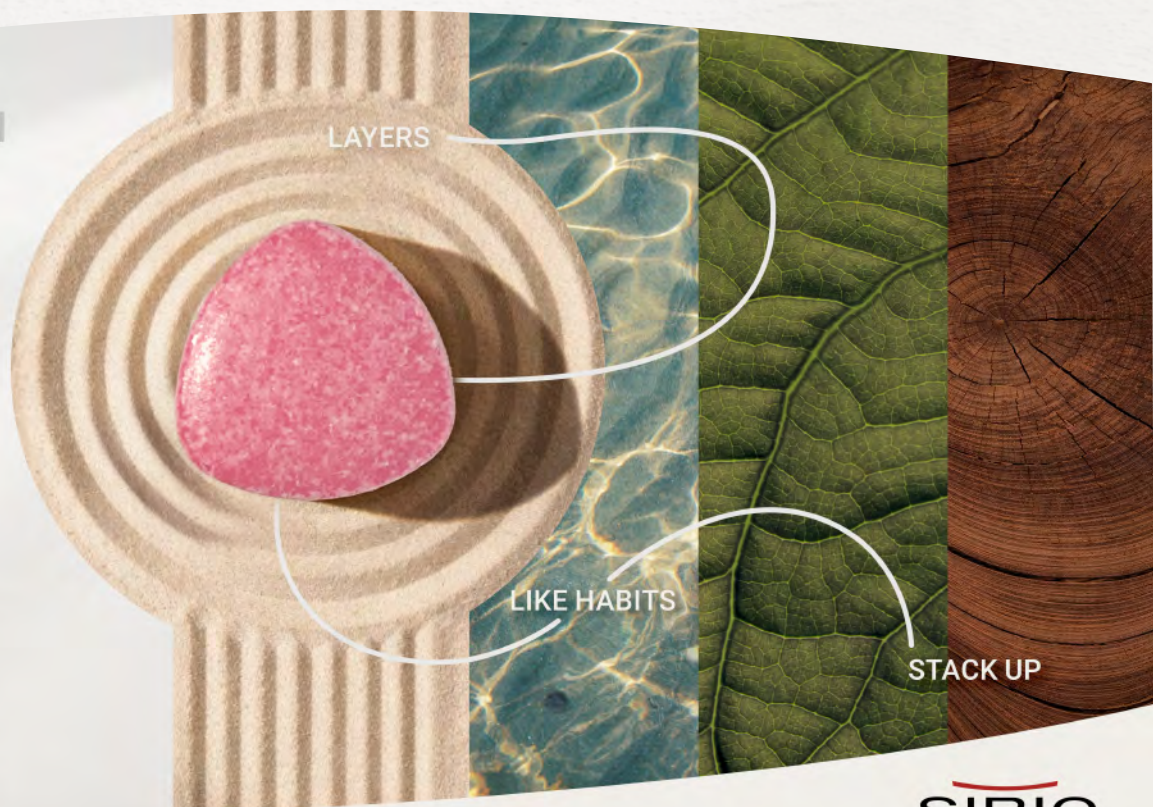

Aeion™ was created in response to this reality. In collaboration with the SIRIO Institute of Aging (SIA), leading longevity research institutions, and world-class ingredient partners, SIRIO has developed a portfolio of ready-to-launch concepts grounded in the latest nutritional science—designed to help brands go to market fast.

Inspired by the quiet, powerful rhythms found in nature—ripples in water, rings in wood, balanced stones—Aeion™ reflects the true drivers of longevity: movement, balance, repetition, and time. Derived from the ancient Greek αἰών (aiōn), meaning lifespan as lived rather than measured, Aeion™ is built around small, enjoyable rituals people actually stick with—because real longevity is created through consistency, not complexity.

AEION™ CellAge

WHERE LONGEVITY BEGINS

Aeion™ CellAge supports healthy cellular aging through daily protection against oxidative stress. Powered by algal DHA and vitamin D, and informed by emerging clinical research, it is designed to help protect cells over time – because longevity is built through consistent care, day after day. New long-term studies suggest that vitamin D may help slow telomere shortening, while omega-3s have shown protective effects on biological aging markers such as DNA methylation.^[1]

Together, they form a science-led approach to supporting cell health – helping build resilience at the most fundamental level of longevity.^[1]
